

A-36 3/8" PRESSURE REDUCING VALVES**P.N. #C6125****CONSTRUCTION**

Bronze forged body and spring chamber; bronze trim and diaphragms;
Teflon seat disc and diaphragm gasket; stainless steel pressure spring;
All parts commercially cleaned for cryogenic service.

TEMPERATURE RATING

+ 150° F (399° K) TO -320° F (78° K)

MAXIMUM INITIAL PRESSURE

400 psi (28.12 kg/sq cm)

PRESSURE SETTING

The A-36 regulator is factory set @ 22psig.
Other pressure settings are available upon request.

NOTE:

Regulators allow LN2 to flow in only one direction.
Therefore, the system should be evaluated to determine
if an additional safety relief valve is required.
